

HEATING CYLINDER 240V

Hot Water attachment

Specifications

- ⇒ Rated pump pressure up to 250 Bar (3626 psi)
- ⇒ Suitable for water flow from 12 to 21 L/min
- ⇒ 240 Volt electrical system
- ⇒ 10 A plug single phase
- ⇒ Adjustable temperature up to 150°
- ⇒ Heavy duty machine

Standard Equipment

- ⇒ 2 m high pressure connecting hose
- ⇒ Inlet water filter
- ⇒ Non-return valve & Safety valve
- ⇒ Over-temperature protection
- ⇒ Stainless steel heating coil
- ⇒ Operating and Maintenance manual

Features	Benefits
3 Stage powder-coated zinc-annealed chassis & stainless steel cover	Resistant to corrosion
Adjustable thermostat for hot water temperature control	Set the ideal temperature for any application
High pressure inlet water filter	Protects the heating coil from debris
Non-return valve & safety valve	Safety feature to prevent possibility of blockage
Over-temperature sensor	Safety feature to prevent possibility of overheating
Stainless steel heating coil	Corrosion resistance extends the life of the heating coil
